

# SQL TIPS AND TRICKS

PART 6

## Running Total

MAYURI DANDEKAR

```
14 • select *, sum(cost) over (order by cost asc) as running_cost
15 from products;
16
17 -- if any duplicate cost with unique id --
18 /* select *,
19 sum(cost) over (order by cost asc rows between unbounded preceding and current row) as running_cost
20 from products; */
21
```

Result Grid |   Filter Rows:  | Export:  | Wrap Cell Content: 

	product_id	cost	running_cost
▶	1	200	200
	2	300	500
	3	400	900
	4	500	1400
	5	600	2000
